

JIE SHENG

金詠鴻電機有限公司

JIE SHENG ELEC & MACH. CO., LTD.

With more than 25 years' experience, we manufacture rotors, stators, coils, motor housings and other parts as well as entire motors. We have the capabilities to design, produce and test in house. We ensure our motors quality and performance by testing them with calibration and dynamometer equipment.

The main reason why we are more successful than most motor manufacturers is that we are different. We always think beyond what our customer requests which is why our motors exceed our customers' expectations so that their machines' performance is outstanding.

Choice of 2 pole, 4 pole, 6 or 8 pole:

For high speed requirements (> 45,000 rpm) - 2 poles are recommended for smaller motor sizes; 4 poles can be used if better motor performance is required. If high torque or low speed is required - 6-pole or 8-level specifications are recommended.

The size of the shaft and rotor must also be taken into account.

For special high-speed product requirements, we will use alloys and other materials to enhance product rigidity and performance.

We tailor or design unique products to meet the actual needs of customers.

Main Applications:

Machine Tools,
Metalworking Machinery,
Semiconductor Equipment,
Injection Molding Machines,
Special-purpose
Machines and
Medical Technology.

**WE DO NOT SIMPLY CLAIM TO MAKE OUTSTANDING MOTORS;
WE SET THE BAR FOR CURRENT AND FUTURE MOTOR QUALITY.**

JIE SHENG

金詠鴻電機有限公司

JIE SHENG ELEC & MACH. CO., LTD.

我們生產製造 AC 伺服馬達已超過25年，從轉子、定子、線圈、馬達外殼等零件著手至整個馬達成品完成，包含設計、製作、加工、組裝及測試工作。搭配使用校正機及馬達測試動力計設備來確保馬達效能及品質。

我們不同於一般標準馬達製造商，這是我們更為勝出的主要原因，好還要更好，我們永遠比客戶多想一步，讓客戶的產品因為我們的馬達，發揮出超越標準的水準。

因應機械產品應用量身打造，設計製作客製化的規格以符合客戶的實際需求並創造特有的產品優勢，提供以下規格條件考量：

2極，4極，6或8極的選擇：

如有高轉速需求 (> 45,000 rpm) - 較小的馬達規格建議優先選擇2極；如需要更好的馬達表現，則可以使用4極。

如有高扭力或低速的需求 - 建議使用6極或8級的規格。

心軸及轉子尺寸亦須一併考量。

特別高速的產品需求會另外使用合金等材質加強產品剛性與表現。

適用：

- * 工具機
- * 金屬加工機
- * 半導體設備
- * 射出成型機
- * 專用機
- * 醫療應用等

**我們不只製造優良的馬達，
我們製造的是馬達的未來與標準！**
